SEA Sampling Effectiveness Advisors

Cost Saving Strategies

Research and Analysis

Proven Performance and Experience

- Leadership Experience
- Full Service Capabilities
- Pricing Structures
- Contact Us

Drawing on 12 years of experience, SEA can provide advice on the most effective (and efficient) way to reach a target audience with product samples.

Product Sampling is one of the best marketing tools a brand can use to build loyalty. If a consumer tries your product and likes it, he or she may never consider other options that are available to them. Sampling can also get that new initiative off the ground in a flash ("Try it, you'll like it!"). A brand should ensure that all the proper steps have been taken to minimize that risk.

How can you be sure that your samples are distributed as you intended? That's where SEA can help! We will audit the sample distribution on your behalf.

Whether you are a brand or marketer that needs guidance with consumer sampling, a sampling vendor that wants to improve the outcome of your program, or you are an agency or sales marketing team wanting to maximize the return on a program you responsible for delivering, SEA can be of great assistance in this area of work. Explore our site to determine just how we can help.
